## ECB 2014-17: Application of Energy Models in Design Decisions-CEU Quiz

---

1. The purpose of ECB 2014-17 is to demonstrate compliance with EAct 2005 energy reduction targets and to obtain necessary data for LEED templates

TRUE                      FALSE

2. Participants involved within the energy modeling decision making process are none invested parties within the PDT, including the client/customer and the individual design disciplines.

TRUE                      FALSE

3. What is the compliance standard used for energy model?

Direct and Indirect

Passive and Active

Regression and Progression

Open and Closed

4. Energy models for design and decision consist of four parts.  
True or False?

TRUE                      FALSE
