

# Sustainability & Energy Webinar Course

## Building Energy Solutions for Buildings using IoT

---

1. The acronym "IoT" stands for...
  - A) Intelligence of Technology
  - B) Infrastructure over Technology
  - C) Internet of Things
  - D) Internet on Top
  
2. True or False: IoT is an approach in commercial buildings using sensor technology to gather data on light, heat, occupancy, motion and security.

True

False
  
3. True or False: IoT sensors can only collect light or temperature data  

True

False
  
4. True or False: IoT sensors can support Blue Tooth technology and with RFID tags can provide a location service for tagged equipment?

True

False
